Cyber Guru

Awareness Training Chatbot

CONVERSATIONAL COGNITIVE TRAINING
THAT TRANSFORMS HUMAN BEHAVIOUR

Alex, Cyber Guru's security awareness training chatbot, delivers a continuous, conversational training programme that embeds secure behaviour across your organization.

Available via Teams, Slack, Google Chat or a web app, Alex offers fun, bite-sized learning sessions that are easy to engage with and proven to drive change.

By combining proven cognitive learning principles, expert cybersecurity content, and a conversational chatbot, Alex meets the expectations of today's digitally native learners - delivering awareness training in a format that's familiar, effective, and built to strengthen your organization's security posture, one conversation at a time.

Hybrid Awareness Training
Want to combine the power of video with the fun of conversation?

Cyber Guru offers a unified awareness programme that blends traditional eLearning via Cyber Guru Awareness, with the interactive experience of the Awareness Training Chatbot.
It's a hybrid approach designed to deliver maximum impact through multiple formats.

Continuous Learning that Makes an Impact

Stay ahead of evolving threats

Regularly updated content ensures coverage of core topics, ranging from basic password hygiene to more recent AI-driven attacks.

Tailor content as you need

Fully customizable content allows you to adapt training materials to your specific context and needs.

Maximize engagement without interrupting workflows

Short, interactive sessions (up to 5 minutes) integrate seamlessly into daily routines and minimize disruption.

Drive participation through gamification

Built-in personal progress tracking, awards and company-wide gamification make training rewarding and fun.

Ensure accessibility across global teams

Multilingual support including English, Italian, French, Spanish, Portuguese, German, Dutch, Polish, Romanian, Simplified Chinese, and more-helps learners feel comfortable and stay focused.

Accelerate time-to-value while reducing overhead

With guided setup, pre-configured learning paths, and automated scheduling, deployment is fast, maintenance is minimal, and time-to-value is almost immediate.

Track progress and demonstrate impact

Real-time dashboards and reporting provide actionable insights and help you ensure training goals are met.

Awareness Training Chatbot Features

EFFECTIVE LEARNING
