

Cyber Advisor

GEN-AI CYBERSECURITY ASSISTANT

Security awareness training is essential for building secure habits, but it's no longer enough on its own. In today's fast-paced, high-risk environments, employees face security-critical decisions every day - whether reading emails, using AI tools, or handling sensitive data.

To act safely and confidently, they need immediate, contextual support in the moment it matters most.

Guru, our GenAI cybersecurity advisor, delivers the real-time support that security training alone can't provide. Available 24/7 and on demand, Guru offers instant, expert guidance, empowering your workforce to make smarter security decisions in the moment, while reducing the day-to-day burden on IT and security teams.

From Boardroom to Breakroom

Cyber Advisor is designed for your entire workforce and is available as an add-on to Cyber Guru's Awareness, Channel, and Phishing products. It's also included as a complimentary offer for board members and senior executives as part of the NIS2 and DORA Board Training solutions.

Cyber Expertise at Your Command

Expert-led advice

An LLM-based chatbot with memory and learning capabilities, trained on Cyber Guru's trusted content to deliver guidance on threats, risks, and best practices.

Cybersecurity focused

Built-in guardrails keep Guru strictly aligned with cybersecurity topics, preventing off-topic or inappropriate responses.

Tailored to your organization

Trained on your internal knowledge assets - like IT security policies - Guru becomes your corporate assistant, reducing the load on IT and security teams.

Conversational approach

Delivers fun, engaging support in a conversational style today's digitally native employees expect.

Suspicious email analysis

Something feel off about an email? Cyber Advisor can analyze it and offer contextual advice.

Always-on assistance

Instantly accessible through our web app, ready to assist at the click of a button.

Globally accessible

Multilingual support in 20 languages including English, Italian, French, Spanish, Portuguese, German, Simplified Chinese, and more.
